

## Fair Pricing & Transparency for Peace of Mind

### Long Term Value and Benefits.

For each client, we make every effort to listen to their wants & needs and give the best advice possible to ensure we build with the highest quality expected from us, at a reasonable cost. The result is excellent workmanship, unwavering quality construction that will last many years, well beyond the given warranty. Over this time period, due to less maintenance costs, clients get much better value than choosing the cheapest contractor who have no warranty or whose quality last only a few years before fixing is required.

### Fair Pricing Practice.

As part of our ethical business practices, we follow industry pricing structures and our quotations are based on the market value of construction materials and labour and apply a standard markup. We DO NOT charge for work that is not needed and we do not apply hidden charges. Therefore, we are extremely competitive to other HPO-registered builders with the same experience, qualifications and certifications.

### Budgeting Consultations.

Good budgeting is the direct result of excellent planning. We understand that fulfilling all the client's wants & needs may be out of reach in terms of budget. We will listen and can help prioritize tasks that would make the most impact to your project, and/or suggest ways to separate a large project into smaller phases over a period of years to minimize your financial burden.

### Financing.

Clients have always been satisfied with the fair payment plan. For every project we receive a deposit, and then pre-determined payments at agreed upon dates in the schedule. Full payment is NOT received until we finished your project to your satisfaction.
